BAG FILTERS AND BASKET STRAINERS

Did you ever wonder where bag filters and basket strainers can be used? What applications do they have? Do you want to expand your market base? Check out the listings below and see just a portion of the industries served and the applications bag filters and basket strainers have.

- Vegetable oil
- Wine
- Fruit juice
- Printing ink
- Aerosol products
- Coil coatings
- Cutting fluids
- Industrial coatings
- Paint
- Transformer oil
- Lacquer
- Polymer solutions
- Plastics
- Cooling towers
- Machine tool coolants
- Beer
- Bottled water
- Amines
- Lotions
- Parts cleaners
- Plating
- Hydraulic oils
- Varnishes
- Acids
- Pigments
- Liquid detergent
- Cleaning fluids
- Waste oil
- Crude oil
- Gasoline
- Paper coatings
- Adhesives
- Process water
- Pharmaceuticals
- Chemicals
- Liquid sugar
- Latex solutions
- Dyestuffs
- Ground water
- Reverse osmosis
- Syrup
- Solvents
- Waxes
- Perfumes
- Clay slurry
- Pigmented coatings
- Fresh water
- Mill water
- Soft drink processing
- Magnetic coatings
- Herbicides
- Hydrochloric acid
- Resins
- Sulphuric acid
- Adhesives
- Liquors
- Shampoo
- Dyes
- Beverages
- Toothpaste
- Ethylene glycol
- Cooling water
- Circuit board DI water line
- Liquid silicone coatings
- Cooling tower water
- Injection fluids
- Completion fluids
- Synthetic lubricants
- Motor oil
- Naphtha
- Pump seal water
- Feedstocks
- Reduced crude oils
- Acetic acid
- Brine
- Calcium carbonate
- Gasoline distribution
- Oil/gas production
- Deep well injection
- Pump seal water
- Peanut butter
- Corn syrup
- Lard
- Dextrose
- Chocolates
- Jellies
- Milk sugar
- Soybean concentrate
- City and well water
- Tea liquor
- Extracts
- Optical lens mfg
- Ultrapure water systems ozonated

The above list is by no means a complete list. It is meant to be used as a “brainstorming tool” to fuel additional ideas that may help recognize prospective areas where filter bag housings may work. Filter bag housings are made in a variety of sizes and materials to meet your specific requirements. There are also many different filter bag media options and micron sizes available. Don’t forget to see how Flow Ezy’s pleated filter bags can reduce service time by extending the length of time between bag changes.

PLEATED FILTER BAGS FOR BAG FILTER HOUSINGS

Flow Ezy’s pleated filter bags give up to 12 times the filtration that standard sock-type filter bags do. They are just like cartridges, providing more surface area. Standard size #2 sock-type bags has 4.4 sq. ft of filtering area. Our pleated #2 size bag has 25 sq. ft. of filtering area. Frequent bag changings are a thing of the past with Flow Ezy’s pleated filter bags. Consider using our pleated filter bags where cartridges are generally used. They work!

Patent Pending

With the flow direction being inside-out, all the pressure is pushing on the walls and bottom. Without the “Quick-Turn-Bolt” configuration and seat against the basket, the bottom seal would be broken rendering the pleated bag useless. Consider Flow Ezy’s “Quick-Turn-Bolt” option. Contact Flow Ezy for more information.
