**AIR FILTRATION EDITION**

ALL OF OUR PRODUCTS ARE STILL MADE IN THE USA

### WE NOW OFFER FILTERS FOR COMMERCIAL AIR APPLICATIONS

In these rough economic times, why would we want to step into uncharted territory and introduce new products?

- We are good at what we do!
- We have always been creative, innovative, and pro-active in the industrial filtration industry
- There is a need for commercial air filtration products for cleaner and healthier air in the workplace and home
- Why not?

We have manufactured filters for fluid applications for over 60 years with our goal of helping fluid power and fuel systems to run smoothly and efficiently. What about air filtration? The single most important thing we can do for you in this area is to keep your office air conditioning and heating system working efficiently. So if you work in a college, university, hospital, general office, restaurant, retail store, church, museum, factory, hotel, shop, or other business, give us a call to see if we can help keep your energy bills down, your equipment repairs at a minimum, and lengthen your equipment service life. Remember, you can save money by properly maintaining and upgrading your commercial air filters. See our web site for more information.

### NOW THAT YOUR BUSINESS IS TAKEN CARE OF, WHAT ABOUT YOUR CUSTOMERS?

Whether the filter needs to be installed in a rooftop unit, paint booth, general office, shop, or anywhere else in their heating and air conditioning system, Flow Ezy has many makes and models from inexpensive disposable, to pleated and washable permanent filters.

Media varieties are pleated or layered, non-woven synthetic made from recyclable materials, fiberglass, continuous spun glass, gradient layers of polyester, or aluminum media.

**CLEAN AIR**  
it's up to us

For more information about our commercial air filtration line, please go to our web site or give us a call, e-mail, or fax and ask how we can help you improve indoor air quality. You can lower fan energy consumption, reduce maintenance, and keep you air handling units running cleaner. It's up to all

of us to make the inside environment in our own little corner of the world cleaner and healthier. Take a big breath!
