PORTABLE FILTRATION AND FLUID TRANSFER SYSTEM

FIGHT SYSTEM FAILURE!

It doesn't matter how well designed the system is, off line filtration can reduce contamination within it. The right equipment is always needed for the job and when it comes to preventative maintenance, Flow Ezy's *Portable Fluid Transfer and Filter System* can help.

There are many options available, too, like motor and pump size, connection size, micron combinations, sample ports, cord reel, relief valve, even color.

This system incorporates smart technology to make fluid handling a simple task. It requires less equipment and labor while reducing system contamination. A two stage filter system is used in series.

Flow Ezy's *Portable Fluid Transfer and Filter System* has many applications, such as:

- Fluid transfer from drums or storage tanks to as system reservoir
- Fluid conditioning
- Filtering system oil resulting from failure of a system component
- Removal of water from oil (with optional water removal filter)
- Clean up contaminated fluids
- Can be used as a bypass system while the primary system is being repaired

KEEP YOUR SYSTEM CLEAN!

HOW IS THE ECONOMY AFFECTING YOUR BUSINESS?

In today's business climate it seems we have to struggle for every piece of business we can find. However, by searching for new areas and markets to see your products there may be a gold mine waiting to be found. This is the time when having adequate filtration in your system becomes all the more important. Proper filtration helps maintain system components, which helps them "live" longer, which helps save money. Remember what those before us use to say, "**THE BEST CURE IS PREVENTION!**"

OEM MOBILE HEAVY EQUIPMENT FILTERS

Flow Ezy has an extensive listing of replacement filters for large OEM heavy equipment . Give us a call to see how we can help you in your quest for additional business. We manufacture filters for:

- Allis Chalmers
- Caterpillar
- Daewoo

- and others

CROSSOVERS

[Flow Ezy makes every effort to maintain our e-mail list. If you wish not to receive our newsletter please click here and let us know.](#)

GOT FILTER?

How many times and how long did it take you to find a crossover or interchange to another manufacturer's filter. Maybe you never did find it. In addition to our 117 page Catalog CC-2 we have an extensive in-house listing or over 23,000 part number interchanges to other manufacturer's filters. We can cross Parker, Marvel, Vickers, Schroeder, Donaldson, Pall, Wix, Hycon, and many others. So next time let our phone number be your first go-to number when looking to cross someone else's manufactured filter. We'll be happy to help you.
