

IN-LINE AIR & GAS FILTERS

This is our series "E" filter. It is rated up to 20,000 SCFM. They are available with connection sizes from 1 1/2" mnpt to as large as 24" flange. Housings are made in either enameled steel or stainless steel. You have a choice of filtration in either 4 or 10 micron, or a 3 micron coalescing element. It is designed for high flow rates with low pressure drops.

BEAR TRAP FILTER MAGNETS

These are reusable oil filter magnets that wrap around the filter or housing. They can be used on spin-on cans or other metal filter housings. The magnets pick up the ferrous particles prior to the filter media therefore lengthening the life of the filter which requires less down time. Bear Trap Filter Magnets are rare earth magnets and not synthetic ones. Available in two sizes to fit your application. Contact us for the spec sheet.

CUSTOMER SERVICE EXCELLENCE

At Flow Ezy we understand that without you, our customer, there would be no need for our existence. Flow Ezy is a team that has the ability to work together toward a common vision. It is the fuel that allows common people to achieve uncommon results. Simply stated, it is less "ME" and more "WE." That's called teamwork. We will continue to service our customers the best way we know how, by subscribing to the "W-I-T" method - Whatever It Takes!

HYDROGUARD™ AND VENTGUARD™ BREATHERS

It is common knowledge that at least 75% of gearbox failures are a result of contaminated lubricants. These breathers are the ideal solution for the management of lubricant condition in washdown applications of high humidity environments. This is where you will find increased occurrences of gearbox and lubricant failure is due to moisture ingress. This is a patent pending hybrid design which brings the attributes of filtration, desiccant, and membrane technology into one cost effective package. It effectively eliminates ingress of dirt and water through breather ports.

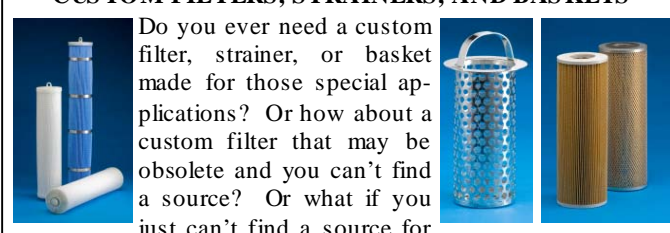

Watch for next month's issue because we will recap the year, highlighting new products, new markets, new directions, and technology advancements of 2007, while taking a look forward to 2008 and what is in store.

"When you reach the end of your rope, tie a knot in it and hang on."

"If angry, count to 10 before you speak. If very angry, count to 100."

- quotes by Thomas Jefferson

CUSTOM FILTERS, STRAINERS, AND BASKETS

Do you ever need a custom filter, strainer, or basket made for those special applications? Or how about a custom filter that may be obsolete and you can't find a source? Or what if you just can't find a source for what you feel should be a commonly made filter? Contact us for our worksheets. Fill in the blanks and we'll send you back a quote with lead time. Chances are we will be able to help you with your application.

ENVIRONMENTAL SCIENCE WATER POLLUTION

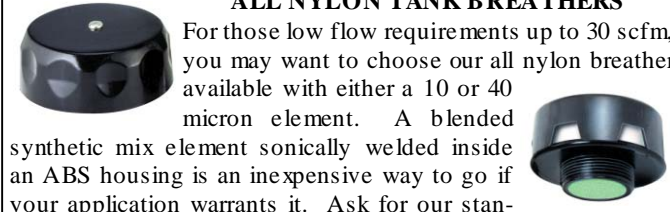

With wastewater being such an issue today let's see if you can answer the following few questions concerning issues with wastewater.

1. Conventional wastewater treatment (primary and secondary treatment) does NOT remove which of the following pollutants from wastewater?
 - dissolved organic wastes
 - sludge
 - phosphorus
 - silt
 - disease-causing agents
2. All of the following represent a category of water pollution except:
 - thermal pollution
 - disease-causing agents
 - sediment pollution
 - organic compounds
 - All are categories of water pollution.
3. One major problem with sewage is that it adds which of the following to the water?
 - carbon dioxide and nitrogen
 - human wastes and heavy metals
 - soil and microorganisms
 - sodium chloride and dissolved oxygen
 - nitrogen and phosphorus

ANSWERS: 1. Phosphorus. 2. All are categories of water pollution. 3. Nitrogen and phosphorus.

ALL NYLON TANK BREATHERS

For those low flow requirements up to 30 scfm, you may want to choose our all nylon breather available with either a 10 or 40 micron element. A blended synthetic mix element sonically welded inside an ABS housing is an inexpensive way to go if your application warrants it. Ask for our standard NBF or NBF-G grip cap style, both with 3/8" to 1 1/2" mnpt threads.

"By three methods we may learn wisdom. First by reflection, which is noblest; second, by imitation, which is the easiest; and third, by experience, which is the most bitter."

- Confucius (551-479 BC)
