

FOR IMMEDIATE RELEASE

MAJOR FILTRATION DISTRIBUTOR ANNOUNCED

Flow Ezy Filters headquartered in Ann Arbor Michigan, one of America's oldest industrial filter manufacturers, has just announced an agreement to become a major distributor of Eclipse Tools of North America to market their line of magnetic filtration and separation products.

Eclipse Magnetics Ltd. whose headquarters is located in Sheffield, England is the parent company of Eclipse North American headquartered in Stoney Creek, Ontario, Canada. Eclipse magnetic products are used by many Fortune 500 companies throughout Europe. By taking advantage of Flow Ezy's extensive distributor network they intend to bring that same success to the North American market.

Flow Ezy's liquid filtration products have supplied US industries since 1945. Throughout that time they have grown to over 3,000 distributors that market their line of hydraulic filtration products around the globe.

Flow Ezy is already serving many of the industries that Eclipse hopes to reach such as, off-road heavy equipment, commercial air filtration, wastewater, fluid power, hydraulic, power generation, food processing, mining and machine tools. Eclipse magnetic filtration line is used where there is a high concentration of ferrous filings that require sub-micron filtration. Magnetic filtration cuts costs by eliminating disposal costs while they extend the life of traditional filters. The quality of manufacturing is improved by increasing part accuracy and improving part finish. Maintenance costs are reduced by extending the life of fluids and reducing part and machinery wear. It is environmentally responsible, as waste can be recycled.

Flow Ezy's, General Manager, Don Krause said, "I'm very excited about this announcement because it brings a perfect addition to Flow Ezy's extensive line of filtration products, as industries seek new ways to reduce the cost of day to day operations."

Flow Ezy can be reached at 800-237-1165, or www.flowezyfilters.com.
