

Back To Basics..... We Can Help!

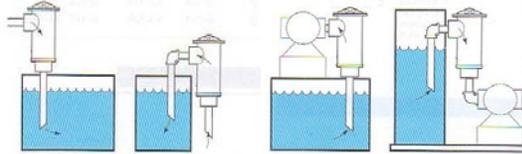

TEXAS FILTERS FOR HIGH FLOW APPLICATIONS

Return Line Filter Selection

As a return line application, it provides an ideal way to pre-condition fluid to higher levels of cleanliness before it returns to the reservoir.

Suction Line Filter Selection

As a suction filter, the most important filter in the entire system, it protects the system's most important component - the pump.

Flow Ezy Texas Filter

In-line filters with flow rates up to 400 gpm, can be used in "up-flow" or "down-flow" applications. Rated to 150 psi. Filtration levels from 25 micron to 595 mi-cron. Can be used for suction or return line applications. Please look at the dia-grams above to see various positioning options. PLEATED FILTER BAGS FOR BAG FILTER HOUSINGS

Flow Ezy's pleated filter bags give up to 12 times the filtration that standard sock-type filter bags do. They are just like cartridges, providing more surface area. The standard size #2, sock-type bag, for example, has 4.4 sq. ft. of filtering area. Our pleated #2 size bag has 25 sq. ft. of filtering area.

There are 3 different top sealing rings to choose from with micron sizes ranging from 1 micron to 90 micron with polypropylene or polyester felt media or polypropylene and polyester micro-fiber media. The media is also 95% efficient.

Contact Flow Ezy and find out how we can help your system run more efficiently. Frequent bag changings are a thing of the past with Flow Ezy's pleated filter bags. Consider using our pleated filter bags where sock-type bags are generally used. They work!

SUMP OR SUCTION STRAINERS

A staple product that has been in our line for over 50 years is the sump strainer. We manufacture them for petroleum based fluids as well as water and other chemically compatible fluids. Placed in the reservoir in the suction line, the sump strainer gives additional life to your pump. They are available in both male and female pipe sizes from 1/4" to 3" npt. Available in 30, 60, 100, or 200 mesh.

Our sump strainers will interchange with many other brands such as Can Flo, Capital, Cim-Tek, Dollinger, Filtrec, General Filter, Gresen, Hycon, Hydra-Craft, Jellif, Lenz, LHA, Lube Devices, Marion, Michigan Fluid Power, Marvel, MP Products, Norco, Norman Filters, Ohio Fabricators, Parker, PTI, Purolator, Ripley, Schroeder, Stauff, UCC, Vescor, Vickers, Zinga, and many others (dimensional specs may vary slightly).
